SWEETHEARTS BALL

Saturday night is the big night in the Forestry College Social Calendar, for the SWEETHEARTS BALL has once again come to town. Through the fine efforts of Bob MacLea, dance chairman, the BALL will be one envied by all. Among the many outstanding features of the night are Freddy Vare and his eight piece orchestra, crowning of the Forestry College Queen from amongst the dates at the dance, refreshments for you chowhounds, door prizes, attractive dance programs, and decorations such as the student lounge has never seen before. You guys bringing SU coeds can keep them out to 2 A.M. as this permission has been granted by SU officials.

Don't forget that tickets are only $1.75 per couple for this great night and this is good from 9 to 1. Tickets are not only available from many members of the Forestry Club, but also available at the Registrars Office, Library Desk, and Extension Office. See Honest John Bright for your special price tickets!!

PHOTO CONTEST

Robin Hood wishes to thank all those men who contributed to the annual Robin Hood photo contest and announces the following winners: 1st Prize - Willard Ulmer; 2nd Prize - Maurice Wrangell; 3rd Prize - George Braman. Honorable mention goes to Gene Ostmark, Norm Richards, and Don Pratt.

CONVOCATION PROGRAMS

In recent years, members of the faculty-student convocation committee have felt that the convocation programs have lacked continuity, and had too much the effect of isolated popular lectures. To overcome this weakness, the committee last year planned series of speakers on closely related subjects and has this year initiated the change.

The first sequence on Forest Policy was highly successful and students have asked for an additional speaker to present more thoroughly the case for utilization of the Preserve. We hope to have one this year. A sequence on Departmental programs has had an excellent beginning and three additional sequences are in various stages of planning.

Any suggestions for series (with or without suggested speakers) would be helpful to the committee. The convocation program should help to broaden student interests and increase knowledge in areas other than forestry. We still have room for improvement in this direction. Please keep this in mind in your suggestions.

C. Schuorch

SENIORS: The time is fast approaching for our annual stag "function." Be thinking of a good location, and if you prefer the "usual location," let "function chairman E, Frank know. Also seniors be thinking over a class gift for the College, and give your suggestions to J. Bright.
CABINET MEETING

The very hazardous condition which exists in front of Bray Hall during times when that hill is icy was discussed and the Cabinet recommended that Prof Plumley and Dean Shirley be enlightened on this danger which exists when the pedestrian students are hoofing it to school and the profs come buzzing up that hill. The editor of this rag suggests closing that road altogether and just using the one behind Bray and the other one down by Hendricks Field. We need a new Vice President for the Cabinet as one of them recently transferred to Liberal Arts (easy way out). Banquet committee set up as follows: publicity - Wolter; tickets - Shad and Namkoong; Entertainment - Meyers; invitations - Burgess; seating - LaGasce; and programs - Krug. Chairman for the Spring Blood Drive will be Bill Ayers. Book covers with our own College seal on the front and a picture of our campus on the back will soon be available. Axes will be purchased for the winners of the chopping events at the Barbeque.

OUR WELCOME TO THOSE WHO HAVE RETURNED

Bob Richards
Bob Birkejst
Nick Engalichev
Ed Novotarski
Jim Roberts
Bruce Smith
Al Stockwell
Dick Knight

MISCELLANEOUS NOTES FROM THE KNOTHOLE

Jim Connelly - Baby girl
Art Roscoe - 2nd in the slalom event at the recent SU sponsored ski meet
Fran Krug - did some jumping at this ski meet (it's not how they do it, but why they do it!!)
Rolf Wallenstrom - engaged to Virginia McGean, Home Ec '55
Bob Richards - to be hitched in August
Walt Deepers - Car kaput (hit a tree like any good stumpie)

BIG CLIMB

Stan Hovey, Art Flick, Bob Schultz, and Charlie Nevin climbed Mt. Washington during the past vacation following exams, and for you people who know that particular hill, you know this was quite an accomplishment in the winter, as the highest wind velocity on the earth's surface have been recorded on its summit and it is the site of many fast, unpredictable, and severe storms. People have lost their lives trying to do this act, so we feel fortunate to have the guys back with us.

JOBS

STUDENT TRAINEE: Open to frosh thru seniors, eligible for G.S. as undergard and permanent with S.C.S. upon graduation, USDA

ANY U.S. CITIZEN: Forester I with Minn. F.S.; $290 to 330, Civil Service
