UGLY MAN

If a rather idiotic gory-garbed individual is seen around the Tree School or there abouts between Weds. and Fri. of this week, you might not be able to tell him from some of our other "individuals". However, he is probably the "UGLY MAN", who, not of his own will, has been entered into the Campus Chest competition.

This man is sponsored neither by independents or greeks, but rather by Alpha Sigma Sigma, an up and coming woman's service sorority. Though these girls have good intentions, they sometimes get carried away.

Voting is done cross campus on the quad.-Weds. through Fri. Votes are each; all proceeds go to Campus Chest. This is definitely a creditable X-campus activity, same purpose as community chest.

Can the College of Forestry swing a campus election? Like it takes Blood Drives? --Sure. Get behind this fine example of a Division I product and push it---anywhere. Quick!

A painful bit, his name cannot be withheld as it must be used for the vote---with all due apologies, it is--BOB METZGER.

P.S. If you do not see this creature, he probably did not get through the eliminations on Tues. night.--So he asks---please forget it!

A FORESTER

The Forester is an amateur woodsman with a college education. There are two classes of foresters. One class believes in keeping abreast of those broad dynamic movements of the present day that challenge the best efforts of the nation's thinkers. The other class fights fire, builds truck trails, plants trees, and wears old clothers.

Some foresters have offices, some live in cities, and some work in the woods. Lots of the foresters spend practically their entire lives in God's great out-of-doors. They love to hunt and fish. They would too if they only had the time.

It used to be said that a forester's best friends were his horse and his axe. Today a forester has no need for a horse and he might cut himself with an axe. Years ago most every forester wore a big Stetson hat and carried a gun on his hip and a flask in his pocket. Nowadays big Stetson hats are worn only in movies, and you hardly ever see a forester carrying a gun.

An interesting thing about a forester's life is that he meets all kinds of people from hobos to multimillionaires. It is not uncommon for a forester to have the privilege of personally doing a millionaire tourist some favor. However there is no record of a millionaire ever doing a favor for a forester.
But even if they don't make much money, it's nice steady work, and they have lots of fun.

Another satisfactory thing about a forester's career is that he is his own master, absolutely independent and answerable to no one for his professional conduct. That is, except to his wife, ladies' garden clubs, sportsmen's associations, nature lovers, newspaper editors, and local politicians.

Forestry is a very pleasant profession because it is so easy to get ahead. Many foresters graduate from college with only a few debts and immediately get a job and a wife. In about ten years time, in addition to the same job and the same wife, they have more debts and five kids. That's why foresters are so happy.

A NOTE OF THANKS

On behalf of the members of the Paul Bunyan Club, and all other individuals who helped on this function, I would like to extend a hearty thanks to all who ventured out into the blizzard of February 11th, to make the Sweetheart's Ball a success. There were many individuals who did tremendous work and a fine job in promoting the dance. I wish to thank all committee members and especially Bob MacLea and his wife, Pat, for their time and effort which made the "Sweetheart's Ball" the success that it was. Special thanks to Mrs. Stewart of the Ute Department, the library staff and the Registrar's Office, also to Howard Lamel and Al Plate who did a great job with coat checking and refreshments at the dance.

Don Burke

COMMENTS ON THE MSG - AN EDITORIAL

The recent MSG and WSG condemnations of the University of Alabama in its handling of the affair with Autherine Lucy has brought to my mind a picture of unjustified self-righteousness. I would like to remind those who condemn so readily, that the situation is foreign to us and also that the eventual working out of the whole problem of race relations takes understanding, patience, and many other qualities of maturity, but never self-righteousness. This is not to say that we should do nothing and condone all but the problem exists here as well as in Alabama and we must solve our own difficulties before accusing others of going further than we. "Let he who is without sin cast the first stone" is an old phrase I learned and I was very much surprised to see that Syracuse University and the C. of F. are without prejudice. I would say that Alabama was wrong but self-righteousness is also wrong and I can draw no other conclusion from the present situation except that our student government presents itself as remarkably Christ-like. Shall we, to paraphrase, pluck the log out of our own eye before plucking the splinter out of the University of Alabama's eye? Or are we a bunch of foolish students who have the answer to all? For one I protest the action of MSG and WSG as showing immaturity and reflecting that on the whole student body.

CAMERA CLUB

Your only hobby club in the college invites all students, graduates, and faculty to their next meeting, February 28, Tuesday night at 7:30 in room 316 Bray for an illustrated period on Wildlife Photography. Dr. Howard Miller, who has much experience, in this field and who now does work for the college from the Zoology Dept. will be the lecturer. He is, at present working on the Dutch Elm Disease, but has many slides and interesting experiences to relate. He will also give tips on techniques that he has learned over the years. So, we'll be seeing you at our next meeting, and bring a friend if he (or she) is interested in wildlife. Refreshments will be served.
PUZZLE

For those very boring classes (which are rare at the C.F.) this puzzle has come for you to work out. There is a possible answer to this if you work at it hard enough. The winning solution will win a big prize of ten (10) free, free, free Knothole's.

You have just twelve ping pong balls, and a balancing scale and no other equipment, which means no weights. Using the scales just three times, find out which of the twelve balls is off-weight. This ball is either lighter or heavier than all of the others which are of equal weight. You do not know whether this ball is heavier or lighter but, by your three weighings, you can find out.

KAPPA PHI DELTA

The professional forestry fraternity has announced three new initiates to the fold. They are: Fred Aufschlager, Bob Ulbrich, and Larry Brown. Congratulations!

LETTER TO CERTAIN PROFESSORS

Dear Sirs:

It has come to my attention that someone is trying to besmirch my good reputation by sending rather mushy St. Valentine's Day cards to certain of my professors. I realize that you're all real sweet but you are just not that sweet. So all in all, I claim complete innocence of this whole affair.

Richard F. Murphy

HITCHIN POST NEWS

Engaged: Gene Namkoong, G.F. '56 to Carol Ann Rosenkrance—nursing.
