INFORMATION PLEASE

Although we are 99.44% pure, our school needs improvement - where does one begin? We need your help, your suggestions, and your constructive criticisms.

Do you wonder why your advisor won't approve your petitions and another advisor will? Why must foresters be required to live in University housing? Who is on the Academic Standards Committee and what criteria determines their decisions? How are administrative decisions passed down from the top? Are yearbook editors being paid? Must our student lounge be an experiment in terror? How are prospective freshmen selected? Don't let your questions go unanswered - know your school.

We need suggestions from you and also your interest in student, faculty, and administration smokers. The number of satisfactory topics for discussion will determine when and how often the smokers will be held. Questions will be answered by faculty and administrators who are best qualified to answer questions in their respective fields.

Please place your questions in the Student's Association mailbox. Help Us Help You.

Steve Shanger
Pres. Student's Assoc.

FORESTRY ASSOCIATION

Forestry students here at the College and perhaps some of the newer faculty members may not be aware of a new Association that has been formed in the past 3 years. Headquarters at present are at the College of Forestry with Professor Floyd
E. Carlson serving temporarily as Secretary.

Anyone who is interested in advancing the cause of forestry in New York State is invited to join. No doubt many of the parents of forestry students have forest land and would like to know about this Association.

Those interested can secure information from the Extension Secretary, Room 122 Bray Hall

SCHOLARSHIP

Milton Conservation Club Award - In 1964, the Milton Conservation Club established at the College of Forestry a fund to be used for the annual awards of $100 each. The recipient must be a resident of Onondaga County. First consideration will be given to sophomores, juniors or seniors in Resources Management, Forest Biology and Forest Engineering curriculums.

Applications may be filed with Mrs. Speer in room 107 Bray Hall on or before Thanksgiving Recess, November 23 - 28, 1966.

Raymond F. Crossman
Dean of Students

ATTENTION FRESHMEN

The officers which have been elected are:

President: Donald McKay
Vice-President: Dave Bleyle
Secretary-Treasurer: Fred Dembowski
Social Chairman: Sharon Grimes

The best of luck to the Freshman officers and to the Freshman class.

GRADUATE SMOKER

7:30 - 9:00 Marshall Lounge Wednesday, October 26, 1966
Sponsored by Alpha Xi Sigma to discuss the possibilities and opportunities for graduate study today.

MOOSEWOOD'S NOTEBOOK #39

Both of the following statements are "true". Lucky is he who understands and appreciates them both.

1. "Seeds are distributed by the wind. They fall upon the ground, and are covered perhaps by leaves. In spring when the ground temperature reaches a certain level, the seeds germinate."
2. "Oh thou
Who chariottest to their dark wintry bed
The winged seeds, where they lie cold and low
Each like a corpse within its grave, until
Thine azure sister of the spring shall blow
Her clarion o'er the dreaming earth."

From *Ode to the West Wind* by Shelley

**DENDO STUDENTS TAKE NOTE**

Are you perplexed by scientific names, how to separate "valuable" *Fragus grandifolia* from "majestic" *Hamamelis virginiana*, or which family *Pinus strobus* belongs to?

Then read carefully the following statement by the famous biologist Hochreutiner:

".....in nature there are no families, no genera, no species.....; there are only individuals more or less resembling one another."

**FIRE DRILL**

**NOVEMBER 3, 1966**

**BE PREPARED**

Let's be ready for this drill and have the best one possible.
